

March 4, 2016

To Our Valued Customers:

I am writing to inform you that Materne North America Corporation is voluntarily recalling specific packages of GoGo squeeZ® applesauce pouches due to potential adulteration from food product residue. The recalled applesauce packs have the following identifiers:

- “Product of USA” displayed under the Nutrition Facts Panel
- 6 digit production code ending in 01, 02, 03, 04, 05, 06, 07 or 08
- A Best Before Date of 12/4/15-3/4/17

GoGo squeeZ® Organic and GoGo squeeZ® Yogurtz are not included in this voluntary recall.

No illnesses have been reported to date in connection with this issue. An inspection by the Michigan State Department of Agriculture and Rural Development (MDARD) discovered food product residue in two product pumps. While it is possible that the food product residue found its way to pouches, after extensive routine testing, there has been no evidence of food product residue in any pouches to date. However, out of an abundance of caution, the company is voluntarily recalling the specific pouches with affected codes.

Production from the concerned plant has been suspended while MNA and MDARD officials continue their investigation as to the source of the problem. Again please note that this does not include organic or dairy products.

Attached you will find a detailed guide for identifying the affected pouches, packs and cases.

We will work with you to make the necessary administrative adjustments to ensure all applicable reporting is completed.

Materne takes food safety matters very seriously and we apologize for any inconvenience this may cause you.

Your Materne Sales Representative will be contacting you with further details.

Please do not hesitate to contact me with any other questions.

Sincerely,

Paul Kenny
